

Changes in the Landscape

Storm Damage

Old Roads
& Trails

Forestry

Fire

Natural and human-caused disturbances can change the landscape on any property. Not all disturbances are cause for concern, but all should be documented. As a Land Steward be sure to:

- Take notes about any major physical changes you see on the landscape. Doing this will help build knowledge about each individual easement.
- Draw sketch maps to illustrate the location of the disturbance. Take photographs only of major changes.
- Discuss your observations with staff.

Disease
& Insect Infestation

Development

Agriculture

Dumping
